## WINDSOR.

[FROM OUR CORRESPONDENT.]  
SCHOOL OF ARTS.—The sixth lecture of the season was delivered on Wednesday evening, the 16th instant, by the Rev. Mr. Walter, president of the choir. The lecturer commenced with an allusion to that part of the Pilgrim's Progress, where Christian was brought to the Palace, which was called beautiful, and there shown the pedigree of the "King of the Hill; the extent of days," and told of the "dread of a serpent." He declared that the Briton had thus given us words which truly described the object of his lecture. He proposed to lay before his audience a sketch, partly historical, partly biographical, of the times, the doings, and manners of the emperors of the early Chinese empire, and of their reigns. He had thus far, in the first three evenings of the Christian era, would put before them. Sketchy and imperfect they must indeed be; but truthful they should certainly be; interesting too, if we could make them so; but if a hasty review of the time of the early Christians afforded no satisfaction to the minds of the audience, it might be better to confine ourselves to something of ministering some little, as Bunyan has it, "to the comfort and solace of Pilgrims." Seeks after more amusement, the lecture will probably not be an attraction, playing with the lightness that distinguishes the surface of the stream. That stream itself, the deep fast tide of history, which brings information to the understanding, and gives growth to noble feeling in the heart, is a grand object for contemplation than its mere surface. It is not to be expected that such a sketch will be more popular than the mountain scene. The bright gold lying deep beneath the bed of that stream is that which engages the interest and rewards in person of the man. After observing that although his subject was in some degree connected with the history of religion and civilization, he had not much to do with the art of painting, still, no objection could be made to historical statements on a subject in itself highly interesting, and referring to a period when modern disagreements were not extreme. The state of truth was not to be got down from the pedestal, however, as it was wrangled around its base. The lecturer then gave a detailed account of the growth of Christianity from the time of the ascension of our Lord to the time of Constantine—pointing out the countries where its light extended, and giving a few statistics. At last, however, as we have an account of that work, he gave his opinion, including in the opinion that St. Thomas visited Britain. Alluding to the tradition that St. Thomas of Antioch had taken a leading part in the work of Christianity in Britain, he said, "though suspicion attached to this tradition, from the want of positive evidence, we may still be quite certain that British bishops presented themselves in the hall of authentic history at the very earliest periods of which we have any record." At length he came to the year of our Lord 170, when the signature of that British Bishop, Justin, appears in the Council of Arles, in France, convened by Constantine. British Bishops were present also at the Councils of Sardica and Ariminum, later in the same century. Thus we had independent evidence of the existence of the church in Britain, and of the English church, probably from an apostle himself, but certainly from their times; and this state of things was existing before the invasion of the Saxons, and earlier than the mission of St. Augustine to those pagan Savages. By three or four hundred years, the Christians who were then scattered over the island had joined together, their faith as expressed in the creeds of the Church; and passed on to the fruits of their faith in their endurance of persecutions, and martyrdoms in its defense. After passing through nine general persecutions to the end of the fourth century, the English church was still in its infancy, and was almost contemptuous of the existence of the old half-millions of Christians who since those days have been added to our numbers, and who cannot be looked upon with the most bitter disgust upon this outrageous presumption.

In 1859, when Lord Grey went to Port Phillip the Randolph and the Ashby, we were about 50,000 strong, and yet we adopted as our motto, "The convicts shall not leave us," and adopted with such energy that Mr. Labouchere, in his speech against the bill, said, "It would be a disgrace to us if we were to be equal to the negroes in a quarter as disgraceful as the negroes."—Lord Grey, when I was present, said, "I am not afraid of the negroes; but I am afraid of the English."

But I rather depart from the Australian. The English, like the English in America, were not averse to the bright light which was to appear in this subject in a few days gone by. I do not know what the lecturer thought of this in those days. And I do not think of the hundred of thousands of high-spirited men who since those days have been added to our numbers, and who cannot be looked upon with the most bitter disgust upon this outrageous presumption.

It is a topic of constant discussion as to whether the old established colonists, or those arriving since the day of victory, have done more for the welfare of the colony. We seem to make a great impression upon the audience. Reference was then made to the martyrdom of Ignatius, Bishop of Antioch, to the martyrs of Gaul, that of Cyprian of Carthage, and of Perpetua and Felicitas, but that of the English, who have labored and suffered more than any other nation in the world, and have done more for the welfare of the colony, the salvation of the soul, and the happiness of the body.

The lecturer then said, "I will maintain that this plant has their names written upon it, and that they are the gibbons of the English."

He then mentioned that Nero's Gardens were the very site of St. Peter's Church, the grandest temple, so far as the fabric is concerned, that the world presents for the moment. The Grecian temple, he said, gave the name to the temple of the sun, and the sun was seen to make a great impression upon the audience. Reference was then made to the martyrdom of Ignatius, Bishop of Antioch, to the martyrs of Gaul, that of Cyprian of Carthage, and of Perpetua and Felicitas, but that of the English, who have labored and suffered more than any other nation in the world, and have done more for the welfare of the colony, the salvation of the soul, and the happiness of the body.
